3 説明

LP8769x-Q1 デバイスは、さまざまな車載用および産業用の安全関連アプリケーションで、最新のプロセッサおよびプラットフォームの電力管理要件を満たすよう設計されています。このデバイスには 4 つの降圧 DC/DC コンバータ・コアがあり、この出力は、5 種類の相構成が可能で、1 つの 4 相出力から 4 つの単相出力までを選択できます。デバイス設定は、I^2C 互換のシリアル・インターフェイス、または SPI シリアル・インターフェイスにより変更可能です。

自動 PFM/PWM (AUTO モード) 動作と、自動相加算および相減算により、広い範囲の出力電流について最大の効率が得られます。LP8769x-Q1 デバイスは、多相出力のリモート差動電圧センシングに対応しており、レギュレータ出力とポイント・オブ・ロード (POL) との間の IR 降下を補償することで出力電圧の精度を高めることができます。スイッチング・クロックを強制的に PWM モードに設定することができ、位相をインターリーブします。スイッチングを外部クロックと同期させることができ、拡散スペクトラム・モードを有効にすることにより、外乱による変動を最小限に抑えられます。

6.4 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

(1) **Status:** For more details on status, see our product life cycle.

(2) **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

(3) **RoHS values:** Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

(4) **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

(5) **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

(6) **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
