

# CSD19536KCS 100V N-Channel NexFET™ Power MOSFET

## 1 Features

- Ultra-low  $Q_g$  and  $Q_{gd}$
- Low thermal resistance
- Avalanche rated
- Pb-Free terminal plating
- RoHS compliant
- Halogen free
- TO-220 plastic package

## 2 Applications

- Secondary side synchronous rectifier
- Motor control

## 3 Description

This 100V, 2.3m $\Omega$ , TO-220 NexFET™ power MOSFET is designed to minimize losses in power conversion applications.

**$R_{DS(on)}$  vs  $V_{GS}$**

## Product Summary

| $T_A = 25^\circ\text{C}$ |                               | TYPICAL VALUE         |     | UNIT       |
|--------------------------|-------------------------------|-----------------------|-----|------------|
| $V_{DS}$                 | Drain-to-Source Voltage       | 100                   |     | V          |
| $Q_g$                    | Gate Charge Total (10V)       | 118                   |     | nC         |
| $Q_{gd}$                 | Gate Charge Gate to Drain     | 17                    |     | nC         |
| $R_{DS(on)}$             | Drain-to-Source On-Resistance | $V_{GS} = 6\text{V}$  | 2.5 | m $\Omega$ |
|                          |                               | $V_{GS} = 10\text{V}$ | 2.3 | m $\Omega$ |
| $V_{GS(th)}$             | Threshold Voltage             | 2.5                   |     | V          |

## Ordering Information

| Device      | Package                | Media | Qty | Ship |
|-------------|------------------------|-------|-----|------|
| CSD19536KCS | TO-220 Plastic Package | Tube  | 50  | Tube |

## Absolute Maximum Ratings

| $T_A = 25^\circ\text{C}$ |                                                                                         | VALUE      | UNIT             |
|--------------------------|-----------------------------------------------------------------------------------------|------------|------------------|
| $V_{DS}$                 | Drain-to-Source Voltage                                                                 | 100        | V                |
| $V_{GS}$                 | Gate-to-Source Voltage                                                                  | $\pm 20$   | V                |
| $I_D$                    | Continuous Drain Current (Package limited)                                              | 150        | A                |
|                          | Continuous Drain Current (Silicon limited), $T_C = 25^\circ\text{C}$                    | 259        |                  |
|                          | Continuous Drain Current (Silicon limited), $T_C = 100^\circ\text{C}$                   | 183        |                  |
| $I_{DM}$                 | Pulsed Drain Current <sup>(1)</sup>                                                     | 400        | A                |
| $P_D$                    | Power Dissipation                                                                       | 375        | W                |
| $T_J, T_{stg}$           | Operating Junction and Storage Temperature Range                                        | -55 to 175 | $^\circ\text{C}$ |
| $E_{AS}$                 | Avalanche Energy, single pulse<br>$I_D = 127\text{A}, L = 0.1\text{mH}, R_G = 25\Omega$ | 806        | mJ               |

(1) Max  $R_{\theta JC} = 0.4^\circ\text{C/W}$ , pulse duration  $\leq 100\mu\text{s}$ , duty cycle  $\leq 1\%$

## 5 Device and Documentation Support

### 5.1 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on [ti.com](https://www.ti.com). Click on *Notifications* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

### 5.2 Support Resources

[TI E2E™ support forums](#) are an engineer's go-to source for fast, verified answers and design help — straight from the experts. Search existing answers or ask your own question to get the quick design help you need.

Linked content is provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's [Terms of Use](#).

### 5.3 Trademarks

NexFET™ and TI E2E™ are trademarks of Texas Instruments.

All trademarks are the property of their respective owners.

### 5.4 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

### 5.5 Glossary

[TI Glossary](#) This glossary lists and explains terms, acronyms, and definitions.

## 6 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

### Changes from Revision B (October 2014) to Revision C (May 2024) Page

- Updated the numbering format for tables, figures, and cross-references throughout the document..... 1

### Changes from Revision A (April 2014) to Revision B (April 2014) Page

- Updated Pulsed Drain Current conditions ..... 1
- Updated the SOA in [Figure 4-10](#) ..... 4

### Changes from Revision \* (January 2014) to Revision A (April 2014) Page

- Increased pulsed current rating to 400A ..... 1
- Updated SOA curve..... 4

## 7 Mechanical, Packaging, and Orderable Information

The following pages include mechanical packaging and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

<sup>(1)</sup> **Status:** For more details on status, see our [product life cycle](#).

<sup>(2)</sup> **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

<sup>(3)</sup> **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

<sup>(4)</sup> **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

<sup>(5)</sup> **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

<sup>(6)</sup> **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "-" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

## TUBE

\*All dimensions are nominal

| Device        | Package Name | Package Type | Pins | SPQ | L (mm) | W (mm) | T (μm) | B (mm) |
|---------------|--------------|--------------|------|-----|--------|--------|--------|--------|
| CSD19536KCS   | KCS          | TO-220       | 3    | 50  | 532    | 34.1   | 700    | 9.6    |
| CSD19536KCS   | KCS          | TO-220       | 3    | 50  | 534.5  | 33     | 7000   | 3.4    |
| CSD19536KCS.B | KCS          | TO-220       | 3    | 50  | 534.5  | 33     | 7000   | 3.4    |
