

SN74LV32A-Q1 SCLS516D - JULY 2003 - REVISED AUGUST 2023

## SN74LV32A-Q1 Quadruple 2-Input Positive-Or Gate

### 1 Features

- Qualified for automotive applications
- Operation of 2-V to 5.5-V V<sub>CC</sub> •
- Max t<sub>pd</sub> of 6.5 ns at 5 V
- Typical V<sub>OLP</sub> (output ground bounce) <0.8 V at V<sub>CC</sub> ٠ = 3.3 V, T<sub>A</sub> = 25°C
- Typical V<sub>OHV</sub> (output V<sub>OH</sub> undershoot) >2.3 V at  $V_{CC} = 3.3 \text{ V}, \text{ T}_{A} = 25^{\circ}\text{C}$
- Support mixed-mode voltage operation on all ports
- ٠ Ioff supports partial-power-down mode operation

### 2 Description

These quadruple 2-input positive-OR gates are designed for 2-V to 5.5-V V<sub>CC</sub> operation.

#### **Package Information**

| PART NUMBER  | PACKAGE <sup>1</sup> | PACKAGE SIZE <sup>2</sup> |  |  |
|--------------|----------------------|---------------------------|--|--|
| SN74LV32A-Q1 | PW (TSSOP, 14)       | 5.00 mm × 6.4 mm          |  |  |

- For all available packages, see the orderable addendum at (1) the end of the data sheet.
- (2) The package size (length × width) is a nominal value and includes pins, where applicable.

# 5 Specifications

## 5.1 Absolute Maximum Ratings

over operating free-air temperature (unless otherwise noted)<sup>1</sup>

|                  |   |   | MIN  | MAX                   | UNIT |
|------------------|---|---|------|-----------------------|------|
| V <sub>CC</sub>  | Supply voltage range                              | upply voltage range   |      |                       | V    |
| VI               | Input voltage range <sup>1</sup>                  |   | -0.5 | 7                     | V    |
| Vo               | Voltage applied to any output in the h            | Voltage applied to any output in the high-impedance or power-off state <sup>1</sup> |      | 7                     | V    |
| Vo               | Output voltage range <sup>1 2</sup>               |   | -0.5 | V <sub>CC</sub> + 0.5 | V    |
| I <sub>IK</sub>  | Input clamp current                               | V <sub>1</sub> < 0  |      | -20                   | mA   |
| I <sub>ОК</sub>  | Output clamp current                              | V <sub>0</sub> < 0  |      | -50                   | mA   |
| lo               | Continuous output current                         | $V_{O} = 0$ to $V_{CC}$   |      | ±25                   | mA   |
|                  | Continuous current through V <sub>CC</sub> or GND |   |      | ±50                   | mA   |
| T <sub>stg</sub> | Storage temperature                               | Storage temperature   |      | 150                   | °C   |

(1) Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These are stress ratings only, which do not imply functional operation of the device at these or any other conditions beyond those indicated under Recommended Operating Conditions. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

(2) The input and output negative-voltage ratings may be exceeded if the input and output current ratings are observed.

(3) The value is limited to 5.5-V maximum.

### 5.2 ESD Ratings

|   |   | VALUE | UNIT |  |
|---|---|-------|------|--|
| V <sub>(ESD)</sub> Electrostatic<br>discharge | Human body model (HBM), per AEC Q100-002 <sup>1</sup> | ±2000 | V    |  |

(1) AEC Q100-002 indicates that HBM stressing must be in accordance with the ANSI/ESDA/JEDEC JS-001 specification.

#### **5.3 Recommended Operating Conditions**

over operating free-air temperature (unless otherwise noted)<sup>1</sup>

|                 |                            |                                  | MIN                   | MAX                   | UNIT |  |
|-----------------|----------------------------|----------------------------------|-----------------------|-----------------------|------|--|

| Cpd |                               | $C_{L} = 50 \text{ pr}, 1 = 10 \text{ MHz}$ | 5 V             | 11.5 |      |

#### **6** Parameter Measurement Information

- A. C<sub>1</sub> includes probe and jig capacitance.
- B. Waveform 1 is for an output with internal conditions such that the output is low, except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high, except when disabled by the output control.
- C. All input pulses are supplied by generators having the following characteristics: PRR  $\leq$  1 MHz, Z<sub>0</sub> = 50  $\Omega$ , t<sub>r</sub>  $\leq$  3 ns, t<sub>f</sub>  $\leq$  3 ns.
- D. The outputs are measured one at a time, with one input transition per measurement.
- E.  $t_{PLZ}$  and  $t_{PHZ}$  are the same as  $t_{dis}$ .
- F.  $t_{PZL}$  and tPZH are the same as  $t_{en}$ .
- G.  $t_{PHL}$  and  $t_{PLH}$  are the same as  $t_{pd}$ .
- H. All parameters and waveforms are not applicable to all devices.

#### Figure 6-1. Load Circuit and Voltage Waveforms

## 7 Detailed Description

#### 7.1 Overview

These quadruple 2-input positive-OR gates are designed for 2-V to 5.5-V  $V_{CC}$  operation.

The SN74LV32A performs the Boolean function Y = A + B or  $Y = \overline{A \cdot B}$  in positive logic.

This device is fully specified for partial-power-down applications using  $I_{off}$ . The  $I_{off}$  circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

### 7.2 Functional Block Diagram

Figure 7-1. Logic Diagram, Each Gate (Positive Logic)

#### 7.3 Device Functional Modes

| INPUT | OUTPUT <sup>(2)</sup> |   |  |  |  |  |  |  |
|-------|-----------------------|---|--|--|--|--|--|--|
| Α     | В                     | Y |  |  |  |  |  |  |
| Н     | Х                     | Н |  |  |  |  |  |  |
| Х     | Н                     | Н |  |  |  |  |  |  |
| L     | L                     | L |  |  |  |  |  |  |

#### Table 7-1. Function Table

(1) H = High Voltage Level, L = Low Voltage Level, X = Don't Care
(2) H = Driving High, L = Driving Low, Z = High Impedance State

### 8 Device and Documentation Support

#### 8.1 Documentation Support (Analog)

#### 8.1.1 Related Documentation

The table below lists quick access links. Categories include technical documents, support and community resources, tools and software, and quick access to sample or buy.

### 8.2 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on ti.com. Click on *Subscribe to updates* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

#### 8.3 Support Resources

TI E2E<sup>™</sup> support forums are an engineer's go-to source for fast, verified answers and design help — straight from the experts. Search existing answers or ask your own question to get the quick design help you need.

Linked content is provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's Terms of Use.

#### 8.4 Trademarks

TI E2E<sup>™</sup> is a trademark of Texas Instruments.

All trademarks are the property of their respective owners.

#### 8.5 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

#### 8.6 Glossary

TI Glossary This glossary lists and explains terms, acronyms, and definitions.

#### 9 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

#### **PACKAGING INFORMATION**

| Orderable part number | Status | Material type | Package   Pins  | Package qty   Carrier | RoHS | Lead finish/<br>Ball material | MSL rating/<br>Peak reflow | Op temp (°C) | Part marking      |
|-----------------------|--------|---------------|-----------------|-----------------------|------|-------------------------------|----------------------------|--------------|-------------------|
|                       | (1)    | (2)           |                 |                       | (3)  | (4)                           | (5)                        |              | (6)               |

| SN74LV32ATPWRG4Q1.A   | Active | Production    | TSSOP (PW)   14 | 2000   LARGE T&R      | Yes  | NIPDAU                        | Level-1-260C-UNLIM         | -40 to 105   | (LV32AT, LV32ATQ) |

<sup>(1)</sup> **Status:** For more details on status, see our product life cycle.

<sup>(2)</sup> Material type: When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

<sup>(3)</sup> RoHS values: Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

<sup>(4)</sup> Lead finish/Ball material: Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

<sup>(5)</sup> MSL rating/Peak reflow: The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

<sup>(6)</sup> Part marking: There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

## **PW0014A**

## **PACKAGE OUTLINE**

## TSSOP - 1.2 mm max height

SMALL OUTLINE PACKAGE

NOTES:

- 1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M. 2. This drawing is subject to change without notice. 3. This dimension does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not
- exceed 0.15 mm per side.
- 4. This dimension does not include interlead flash. Interlead flash shall not exceed 0.25 mm per side.
- 5. Reference JEDEC registration MO-153.

## PW0014A

## **EXAMPLE BOARD LAYOUT**

## TSSOP - 1.2 mm max height

SMALL OUTLINE PACKAGE

NOTES: (continued)

6. Publication IPC-7351 may have alternate designs.

7. Solder mask tolerances between and around signal pads can vary based on board fabrication site.

## PW0014A

## **EXAMPLE STENCIL DESIGN**

## TSSOP - 1.2 mm max height

SMALL OUTLINE PACKAGE

NOTES: (continued)

9. Board assembly site may have different recommendations for stencil design.

<sup>8.</sup> Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.
