

Power Reference Design for the TMS320C6472 12-Vin Digital Power Controllers and LDOs (8x C6472)

This design was created to help designers wishing to design up to eight TMS320C6472 Digital Signal Processors (DSP) into a system using a nominal input voltage of 12 V, having a highly flexible power design, the ability to monitor temperature, and dynamically monitor and control voltage and current.

1 Introduction

This reference design is for powering up to eight TMS320C6472 DSPs and accounts for voltage and current requirements given in [Table 2](#). The core voltage has been optimized for 1-V operation. This design also includes enough margin on the 1.8-V rail to account for typical amounts of memory (2 x 667MHz DDR SDRAM) per TMS320C6472, which comes to just over 600 mA.

The TMS320C6472 requires a 3.3-V, 1.8-V, 1.2-V, and 1-V/1.1-V/1.2-V input. Power-up sequencing is required and is shown in the following power specification table ([Table 1](#)). In multivoltage architectures, coordinated management of power supplies is necessary to avoid potential problems and ensure reliable performance. Power supply designers must consider the timing and voltage differences between core and I/O voltage supplies during power-up and power-down operations.

Sequencing refers to the order, timing, and differential in which the two voltage rails are powered up and down. A system designed without proper sequencing may be at risk for two types of failures. The first of these represents a threat to the long-term reliability of the dual-voltage device, while the second is more immediate, with the possibility of damaging interface circuits in the processor or system devices such as memory, logic, or data converter integrated circuits (IC)

Another potential problem with improper supply sequencing is bus contention. Bus contention is a condition when the processor and another device both attempt to control a bidirectional bus during power up. Bus contention may also affect input/output (I/O) reliability. Power supply designers must check the requirements regarding bus contention for individual devices.

2 Power Requirements

The power requirements for each TMS320C6472 are listed in [Table 1](#).

For more information and other reference designs, visit www.ti.com/processorpower.

Table 1. TMS320C6472⁽¹⁾ Power Requirements

Core, I/O	Pin Name	Voltage (V)	I _{max} (mA)	Tolerance	Sequencing Order	Timing Delay
Core	CVDD, CVDD2 ⁽²⁾	1 / 1.1 / 1.2	9500	± 5	2	<200 ms
	CVDD1	1.2	260	± 5		
IO	DVDD33	3.3	100	± 5	1	<200 ms
	DVDD18 ⁽³⁾ , DVDD15	1.8 ⁽⁴⁾	150	± 5		
Analog	AVDDA1, AVDDA2, AVDDA3, DVDDD	1.8 ⁽⁴⁾	190	± 5	3	<200 ms
	AVDDA, DVDDD, AVDDT, AVDDA4, DVDDR	1.2	170	± 5		

⁽¹⁾ Consult the TMS320C6472 power spreadsheet for your exact power requirements.

⁽²⁾ CVDD and CVDD2 are 1 V @ 500 MHz, 1.1 V @ 625 MHz ($I_{max} = 4900$ mA), and 1.2 V @ 700 MHz ($I_{max} = 9500$ mA).

⁽³⁾ DVDD18 voltage rail includes power required for external DDR2 memory.

⁽⁴⁾ All 1.8-V rails may be combined, and all 1.1-V rails may be combined; however, follow the filtering recommendations for each voltage rail in the *TMS320C6472 Hardware Design Guide* ([SPRAAQ4](#)).

Table 2. Reference Design Parameters

V _{in}	12 V $\pm 10\%$
V _{out1}	1 V $\pm 5\%$ at 40 A
V _{out2}	1.2 V $\pm 5\%$ at 2.4 mA
V _{out3}	3.3 V $\pm 5\%$ at 8 A
V _{out4}	1.8 V $\pm 5\%$ at 8 A
V _{out5}	1.2 V $\pm 5\%$ at 1.6 A
DDR Termination	0.9 V at 3 A (x8)

3 Device Features

UCD9240

- Fully Configurable Multi-output and Multiphase Nonisolated DC/DC PWM Controller
- Controls Up To Four Voltage Rails and Up To Eight Phases
- Supports Switching Frequencies Up to 2 MHz With 250-ps Duty-Cycle Resolution
- Up to 1-mV, Closed-Loop Resolution
- Hardware-Accelerated, 3-Pole/3-Zero Compensator With Nonlinear Gain for Improved Transient Performance
- Supports Multiple Soft-Start and Soft-Stop Configurations Including Prebias Start-Up
- Supports Voltage Tracking, Margining, and Sequencing
- Supports Current and Temperature Balancing for Multiphase Power Stages
- Supports Phase Adding/Shedding for Multiphase Power Stages
- Synchronous In/Out Pins Align DPWM Clocks Between Multiple UCD9240 Devices
- Fan Monitoring and Control
- 12-Bit Digital Monitoring of Power Supply Parameters

UCD7230A

- Up to 2-MHz Switching Frequency
- Dual-Current Limit Protection With Independently Adjustable Thresholds
- Fast Current Sense Circuit With Adjustable Blanking Interval Prevents Catastrophic Current Levels
- Digital Output Current Limit Flag
- Low Offset, Gain of 48, Differential Current Sense Amplifier
- 3.3-V, 10-mA Internal Regulator
- Dual TrueDrive™ High-Current Drivers
- 10-ns Typical Rise/Fall Times With 2.2-nF Loads
- 4.5-V to 15.5-V Supply Voltage Range

TPS74401

- Soft-Start (SS) Pin Provides a Linear Start-Up With Ramp Time Set by External Capacitor
- 1% Accuracy Over Line, Load, and Temperature
- Supports Input Voltages as Low as 0.9 V With External Bias Supply
- Adjustable Output (0.8 V to 3.6 V)
- Ultralow Dropout: 115 mV at 3 A (Typical)
- Stable With Any or No Output Capacitor
- Available in 5-mm × 5-mm × 1-mm QFN and DDPAK-7 Packages

TPS51200

- 3-A DDR Termination LDO
- VLDOIN Voltage Range: 1.1 V to 3.5 V
- Sink/Source Termination Regulator Includes Droop Compensation
- Requires Minimum Output Capacitance of 20- μ F (Typically 3 × 10- μ F MLCCs) for Memory Termination Applications (DDR)
- PGOOD to Monitor Output Regulation and Remote Sensing (VOSNS)
- ±10-mA Buffered Reference (REFOUT)
- Meets DDR, DDR2 JEDEC Specifications; Supports DDR3 and Low-Power DDR3/DDR4 VTT Applications

TMP300

- Accuracy: ±1°C (Typical at +25°C)
- Programmable Trip Point
- Programmable Hysteresis: 5°C/10°C
- Open-Drain Outputs
- Low-Power: 110 μ A (Maximum)

- Wide Voltage Range: +1.8 V to +18 V
- Operating Temperature Range: -40°C to +150°C
- Analog Out: 10 mV/°C
- SC70-6 and SOT23-6 Packages

Notes:

- These assemblies are ESD sensitive, ESD precautions shall be observed.
- These assemblies must be clean and free from flux and all contaminants. Use of unclean flux is unacceptable.
- These assemblies must comply with workmanship standards IPC-A-610 Class 2.
- Reference designators marked with an asterisk (**) cannot be substituted. All other components can be substituted with equivalent MFG's components.

6 12-Vin, Digital Power Controllers and LDOs (8x C6472)

CH1 – DDR termination, CH2 – Vout 5, CH3 – Vout 4, CH4 – Vout 3
 (1 V/div, 1 V/div, 1 V/div, 2 V/div 4 ms/div)

CH1 – Vout 2, CH2 – Vout 5, CH3 – Vout 1, CH4 – Vout 3
 (1 V/div, 1 V/div, 1 V/div, 2 V/div 4 ms/div)

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
