Radiation Test Report

5962-8951106V2A (UC1525BFK-SP) Radiation Testing

Note: The following radiation test results are provided for information only, as these devices are not Radiation Hardness Assured (RHA) at this time.

Samples of the 5962-8951106V2A, UC1525BFK-SP, device have been evaluated to determine performance effects after Total Ionizing Dose (TID) radiation exposure. Since the purpose of this new device qualification was to improve low dose rate TID performance for the existing device function based on customer request, the initial radiation test plan for this device involved testing 40 units at a dose rate of 10 mrad/second, with samples pulled at various total dose intervals. Twenty samples were exposed under unbiased conditions, and 20 samples were exposed under biased conditions. For the biased samples, the bias conditions were the same as the circuit used for burn-in.

Radiation exposure for all samples was performed at Radiation Assured Device, Inc. in Colorado Springs, CO. Pre and post radiation electrical testing was performed by Texas Instruments in Sherman, TX.

The TID samples were pulled from the initial qualification lot after completing normal class-V processing (assembly, burn-in, full-temp testing), and serialized datalogs were collected at 25C before and after radiation exposure. The electrical testing results are included in the release documentation. The test results are summarized below.

Device Traceability Information Confirmed By: Date:	 Kevin Treece 10/23/2008
Full Device Name:	5962-8951106V2A
Datecode or Lot Trace Code:	0827A
A/T Lot #:	8019353ALP
Full Die Name (Alias with Die Rev):	SMFYBRC1525VS
Die Lot #:	8124616SHE

Summary: Units pass up to 40 krad(Si)

Dose rate requirement: 10 mrad(Si)/sec

Exposure groups by S/N:

Control – SN 54 (no radiation exposure)

Biased samples:
10krad(Si) – SN 31, 32, 33, 34, 36
20krad(Si) – SN 37, 38, 39, 40, 41
30krad(Si) – SN 42, 43, 44, 45, 46
40krad(Si) – SN 47, 50, 51, 52, 53

Unbiased samples:
10krad(Si) – SN 5, 7, 8, 9, 10
20krad(Si) – SN 11, 12, 13, 14, 15
30krad(Si) – SN 16, 17, 18, 19, 22
40krad(Si) – SN 25, 27, 28, 29, 30

Units: 41

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as “components”) are sold subject to TI’s terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI’s terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers’ products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers’ products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI’s goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or “enhanced plastic” are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have ***not*** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
