

TI Designs: TIDA-00169

Automotive TFT LCD Display Solution

System Description

This design implements a video over LVDS solution for automotive infotainment applications. It highlights the support of multi-touch with haptic feedback, LCD backlight control, and ambient light sensing, without the introduction of dedicated support lines back to the host processor. This design is implemented using two boards. The main electronics board, SAT0059 is where the deserializer, microProcessor, backlight controller, haptics drivers and power supply are located. The LCD interface board, SAT0096, is a physical and electrical interface to a specific LCD panel. It connects to the SAT0059 through a Samtec board to board connector and provides connection points for the LCD panel, touchscreen, backlight connections and haptic drivers. The SAT0096 is designed for a Microtips UMSH-8596MD-20T display. If a different display is to be used, a new LCD Interface board would likely need to be designed.

Featured Applications

- Front Seat Infotainment Systems
- Rear Seat Entertainment Systems

Design Features

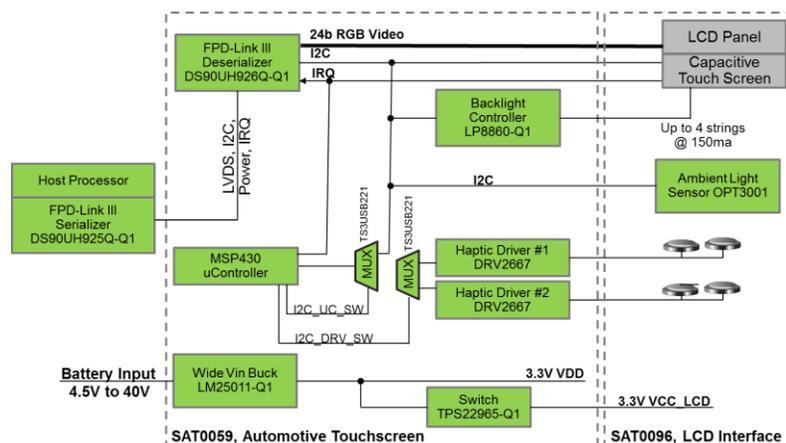

- Wide input voltage range: off battery 4.5V to 40V power supply
- All video and support communications through LVDS
 - Supporting 24 bit RGB Video
 - 400kbit back channel I2C connection for multi-touch input
- Multi-touch input supported via 400Kbit back channel I2C connection

- Haptic feedback
- State of art I2C/SPI interface LED backlighting controller with dimming ratio of >10,000:1, switching frequency ~2.2MHz, hybrid dimming and safety and fault tolerances/functions
- Backlight adjustable to inputs
 - Ambient light sensor
 - Thermistor inputs on the LCD and the back light to enable thermal protection

Automotive TFT LCD Display Solution

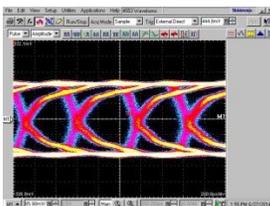

Associated Part Numbers

Part Number	Part Description	EVM
DS90UH925Q-Q1	Automotive FPD-LINK III Multi-Channel Digital Video Serializer	EVM
DS90UH926Q-Q1	Automotive FPD-LINK III Multi-Channel Digital Video Deserializer	EVM
DRV2667	Piezo Haptic Driver with Boost and Digital Front End	EVM
TPS22965-Q1	Automotive 4A, 5.5V, 16mΩ on resistance load switch	EVM
LM25011-Q1	Automotive Wide Vin Non-sync Buck Regulator	EVM
LP8860-Q1	LED Backlighting Controller	EVM

Design Considerations:

- In the SAT0059 reference board:
 - First stage asynchronous buck converter LM25011-Q1 was selected based on its wide VIN range off battery 6V to 40V, 2A output current capability, and switching frequency set to 2MHz to avoid the AM band interference and duty cycle close to 100%.
 - TPS22965-Q1 load switch is used to quickly isolated the one 3.3V versus the other because 3.3V supply to MSP430 needs to be on for standby.
 - MSP430 on the roadmap for automotive qualification was chosen with the ability to implement I2C capability.
 - State of art I2C/SPI interface LED LP8860 backlighting controller with dimming ratio of >10,000:1, switching frequency ~2.2MHz can easily supports up 12-14" LCD screen due to the fact that it can drive 4 LED strings with each string up to 150mA. It also has the capability to do hybrid dimming to better light efficient and to have saftey and fault diagonotics which is important for automotive applications.
 - DRV2667 haptics driver on the roadmap for automotive qualification was selected to have the capability to drive piezo haptic actuator and vibrate the screen to let the user know where they are on the screen and keep the driver eyes on the road.
 - DS90UH925Q-Q1 and DS90UH926Q-Q1 FPD-LINK III serializer and deserializer are chosen to support 720P with content protection, two I2S audio channel, 24bit RGB video and 400kbit I2C. It also can have adaptive equalizer, dithering, and white patterns function to have more vivid video.
- In the SAT0085 reference board:
 - LCD Panel has an integrated LCD bias with a capacitor touch screen to support multi-touch.
 - Ambient light sensor OPT3001 on the roadmap for automotive qualification is to sense the ambient light and send an I2C to control the brightness of LP8860.
 - Piezo haptic actuators are placed haptics driver to vibrate the LCD screen.
- Below is a graph to show the eye diagram captured when LED backlighting and Haptics Driver are on with FPD-LINK III with 3m of STP cable.

IMPORTANT NOTICE FOR TI REFERENCE DESIGNS

Texas Instruments Incorporated ("TI") reference designs are solely intended to assist designers ("Buyers") who are developing systems that incorporate TI semiconductor products (also referred to herein as "components"). Buyer understands and agrees that Buyer remains responsible for using its independent analysis, evaluation and judgment in designing Buyer's systems and products.

TI reference designs have been created using standard laboratory conditions and engineering practices. **TI has not conducted any testing other than that specifically described in the published documentation for a particular reference design.** TI may make corrections, enhancements, improvements and other changes to its reference designs.

Buyers are authorized to use TI reference designs with the TI component(s) identified in each particular reference design and to modify the reference design in the development of their end products. HOWEVER, NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY THIRD PARTY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT, IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI REFERENCE DESIGNS ARE PROVIDED "AS IS". TI MAKES NO WARRANTIES OR REPRESENTATIONS WITH REGARD TO THE REFERENCE DESIGNS OR USE OF THE REFERENCE DESIGNS, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ACCURACY OR COMPLETENESS. TI DISCLAIMS ANY WARRANTY OF TITLE AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, QUIET ENJOYMENT, QUIET POSSESSION, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS WITH REGARD TO TI REFERENCE DESIGNS OR USE THEREOF. TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY BUYERS AGAINST ANY THIRD PARTY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON A COMBINATION OF COMPONENTS PROVIDED IN A TI REFERENCE DESIGN. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, SPECIAL, INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGES, HOWEVER CAUSED, ON ANY THEORY OF LIABILITY AND WHETHER OR NOT TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, ARISING IN ANY WAY OUT OF TI REFERENCE DESIGNS OR BUYER'S USE OF TI REFERENCE DESIGNS.

TI reserves the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques for TI components are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

Reproduction of significant portions of TI information in TI data books, data sheets or reference designs is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards that anticipate dangerous failures, monitor failures and their consequences, lessen the likelihood of dangerous failures and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in Buyer's safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed an agreement specifically governing such use.

Only those TI components that TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components that have **not** been so designated is solely at Buyer's risk, and Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
